

# Technology Without Borders

New Era of Forensic Technology

Install Easily, Stable Operation

# Mobile Forensics System Overview

With the development of mobile Internet services, wireless monitoring has been widely used in on-site forensics and emergency command work. The need for mobile surveillance in police enforcement, security, and emergency command is becoming more and more urgent. The wireless forensic system has the characteristics of flexible response, and the target user situation is transmitted back to the background in time through wireless, which is convenient for remote forensics and command, greatly shortening the reaction time and enhancing the emergency response capability.

"Forensic evidence collection system" is a public security integrated system based on the wireless monitoring system to form a transparent, complete, scientific and efficient forensic platform, and to effectively monitor the target personnel's geolocation and news public opinion. Mainly with information inquiry system (inquiries for target personnel mobile phone contacts, SMS, call records, etc.), social management system (real-time query for target personnel mobile QQ, WeChat, Momo, telegraph messages), monitoring system (before and after target personnel) Photographic, real-time video, call recording) and positioning system consists of four core systems.

A supporting product and evidence collection platform for remote monitoring, intelligence gathering, and rapid response to targeted individuals and groups in the Internet information age.

# Mobile Forensics System Architecture

Structure Diagram

# System Component Introduction

## Cellular Module

The cellular module listens to the instruction forwarded by the receiving server, extracts the internal information of the mobile according to the instruction, and sends the information and return instruction to the server.

## Cloud Server

The cloud server is responsible for forwarding instruction information of the mobile terminal and the PC end; the storage mobile terminal extracts the uploaded information to provide a download service to the pc client; and provides a real-time video streaming service for the mobile terminal and the PC end.

## PC Client

The pc client provides all functions of the forensic system to the user, issues instructions to the server, and receives and displays the results of the instructions and the extracted information transferred back from the server.

# 007 Mobile Forensics Technical Points

Features	Description
Stability	The program runs stably, no crash exception, anti-cleanup process
Concealment	There is no icon on the desktop after the mobile phone is installed, it does not appear in the run list.
Practicality	Can extract SMS, contacts, QQ, WeChat, video surveillance, photo, call recording and other information
Diversity	Can extract text information, video information, voice information, etc.
Uninterrupted	7*24 monitoring around the clock, timely discovering network sentiment and comprehensively grasping the dynamics of online public opinion
Easy to operate	The mobile phone is easy to implant, and the functions of the PC are clearly classified, easy to operate, and clear to display.

# 007 system main function allocation

## 1: Most Used software

Contacts, call history, SMS, location, screenshots, photos

## 2: System

APP list, browsing history, running process, getting password

## 3: Social App

QQ, WeChat, Mo Mo, QQ audio and video, WeChat and Mo Mo audio, skype chat, telegram, telegraph audio and video, etc.

## 4: Monitor

Pre-photographing, post-photographing, real-time recording, real-time voice, call recording

## 5: Real-Time News

QQ, Wechat

## 6: Record

SMS, call, contact, qq, WeChat, Momo, location, telegram

# 1. Main Functions

## Contact

Query the target suspect's mobile phone contact for more valid information

## Call Records

Make an action judgment by querying the target suspect's recent phone call record

## SMS

Query the target suspect's mobile phone SMS record and content, and obtain information about the case

## Positioning

Targeting suspect location information to provide strategic deployment for capture operations

## Screenshot

Get useful information by taking a real-time screenshot of the target phone

## Photo

View the target suspect's mobile phone photo and get the suspect image

# 1. Contact inquiry (mobile phone + SIM card)

Accurate access to target suspects' mobile phone contacts for more effective information

The screenshot displays a web-based interface for a mobile terminal remote control system. At the top, it shows the date 2017/10/31, the time 14-26-29, and the number of logins today (4). The system title is '移动终端远程侦控取证系统' (Mobile Terminal Remote Control and Evidence Collection System). The user is logged in as 'test'.

The interface features a navigation bar with buttons for '常用软件' (Common Software), '系统' (System), '社交管理' (Social Management), '监控' (Monitoring), '历史记录' (History Record), '定位' (Location), '实时消息' (Real-time Messages), and '短信' (SMS).

Two main panels are visible: '联系人' (Contacts) and '通话记录' (Call Log). The '联系人' panel shows a table of mobile phone information:

手机型号	IMEI	IP	地址
MI 3W	865002023263973	175.100.206.66	广东省深圳市罗湖...
F103	860928033095002	171.221.145.181	四川省成都市武侯...
M5 Note	862546035617504	171.221.145.181	四川省成都市武侯...
Coolpad B770	867265024218829	171.221.151.191	等待定位
GN5001S	A100004CE812B3	171.221.145.181	四川省成都市武侯...

The '通话记录' panel shows a table of call logs:

备注	电话号	时间	来源	通话时长
	1008611	2017-10-31 0...	去电	5秒
	18716385187	2017-10-31 0...	去电	5秒
	15208151662	2017-10-31 0...	去电	10秒
大顺	15208151882	2017-10-31 0...	去电	0秒
大顺	15208151882	2017-10-31 0...	去电	1秒
	1008611	2017-10-31 0...	去电	5秒
	18716385187	2017-10-31 0...	去电	5秒
	15208151662	2017-10-31 0...	去电	10秒
大顺	15208151882	2017-10-31 0...	去电	0秒
大顺	15208151882	2017-10-31 0...	去电	1秒
	1008611	2017-10-31 0...	去电	5秒
	18716385187	2017-10-31 0...	去电	5秒
	15208151662	2017-10-31 0...	去电	10秒
大顺	15208151882	2017-10-31 0...	去电	0秒

On the right side, there is a '定位' (Location) panel showing a list of IP addresses and their corresponding locations:

电子围栏	备注
9985M	
10251M	
23389M	
1312M	
5343M	

At the bottom right, it shows a summary: '共计: 5/个 在线: 4/个' (Total: 5/contacts Online: 4/contacts).

## 2. Mobile phone call record (mobile phone + SIM card)

Make an action judgment by querying the target suspect's recent phone call record

The screenshot displays a web-based interface for a mobile terminal remote control system. At the top, the date is 2017/10/31 and the login time is 14-19-22. The system title is '移动终端远程侦控取证系统'. The user is logged in as 'test'. The interface includes a navigation bar with buttons for '常用软件', '系统', '社交管理', '监控', '历史记录', '定位', '实时消息', and '短信'. Below the navigation bar, there are three main sections: '联系人' (Contacts), '通话记录' (Call Records), and '定位' (Location). The '联系人' section is currently active, showing a list of contacts with columns for '序号' (Serial Number), '姓名' (Name), and '电话' (Phone Number). The '通话记录' section shows a table with columns for '手机型号' (Mobile Model), 'IMEI', 'IP', '地址' (Address), and '系统' (System). The '定位' section shows a table with columns for '电子围栏' (Electronic Fence) and '备注' (Remarks). At the bottom, there are statistics for '共计: 5/个' (Total: 5/contacts) and '在线: 4/个' (Online: 4/contacts).

# 3. Introduction To Social Management Functions

## QQ, Wechat

Check the target user  
QQ and WeChat chat  
to get effective  
information

## QQ, WeChat audio and video extraction

Extract the target suspect's  
mobile phone QQ, WeChat  
audio and video files, and  
record the evidence in the  
later stage

## Skype

View overseas chats to  
extract valid information

## Telegram Video

Query the target  
person telegraph  
message and get the  
relevant message

### 3.1.2 QQ

View the target suspect's mobile QQ chat content and chat objects for more information

The screenshot displays a web-based interface for a 'Mobile Terminal Remote Control and Evidence Collection System'. The main navigation bar includes '常用软件', '系统', '社交管理', '监控', '历史记录', '定位', '实时消息', and '短信'. The '社交管理' (Social Management) section is active, showing a '查看QQ聊天记录' (View QQ Chat Record) window.

The '查看QQ聊天记录' window contains the following data:

QQ号	对方QQ号
3501862565.db	2658655094
	2909288299
	9987
	6636420
	2747277822

The chat content for the selected contact (2747277822) shows a message with a URL and a link to a QQ chat record:

2747277822 说: [https://youxi.vip.qq.com/m/act/201710/ysj\\_xnz.html?\\_www=4&\\_wv=1&restag=35104&adtag=adtag.sygzzh.fee&crashFrom=40400web](https://youxi.vip.qq.com/m/act/201710/ysj_xnz.html?_www=4&_wv=1&restag=35104&adtag=adtag.sygzzh.fee&crashFrom=40400web) (国风新游《编号1010》开启预约) [item](#)

◆◆◆◆◆◆◆◆◆◆\_◆◆◆◆◆◆◆◆◆◆

On the right side of the chat window, there is a 'skype聊天' (skype chat) section with a table of chat records:

时间	备注
13M	
2M	
00M	
13M	
90M	

At the bottom of the chat window, it shows '总计: 5/个' and '在线: 4/个'.

## 3.1.2 Wechat

View target suspects' mobile phone WeChat chat content and objects

The screenshot displays a software interface for remote control and data extraction from mobile terminals. The main window is titled "移动终端远程侦控取证系统" (Mobile Terminal Remote Control and Evidence Collection System). The interface includes a top navigation bar with various modules: 常用软件 (Common Software), 系统 (System), 社交管理 (Social Management), 监控 (Monitoring), 历史记录 (History Record), 定位 (Location), 实时消息 (Real-time Messages), and 短信 (SMS). The "社交管理" (Social Management) module is active, showing a list of social media applications and their associated mobile phone information.

At the top left, the date is 2017/11/07 and the phone number is 16-48-49. The top right shows the user name "您好: test".

The "微信聊天记录" (WeChat Chat Record) window is open, displaying a list of chat records. The records are organized into two columns: "微信号" (WeChat ID) and "昵称" (Nickname). The records include:

微信号	昵称
filehelper	文件传输...
qqmail	QQ邮箱...
floatbottle	漂流瓶
shakeapp	摇一摇
lbsapp	附近的人
medianote	语音记事本
newsapp	腾讯新闻
faceboo...	Facebook
qqfriend	查看QQ...

## 3.4 Telegram

View the target suspect's mobile phone telegram message and get powerful intelligence

The screenshot displays a web-based interface for a "移动终端远程侦控取证系统" (Mobile Terminal Remote Control and Evidence Collection System). The interface includes a top navigation bar with the date "2017/11/07", login time "17-14-51", and "今日登录次数: 55". The main navigation menu contains buttons for "常用软件", "系统", "社交管理", "监控", "历史记录", "定位", "实时消息", and "短信".

A modal window titled "查看电报聊天记录" (View Telegram Chat Record) is open, showing the following information:

- 当前登录电报账号信息:  
账号ID: 451920696 昵称: andrews 电话号码: 8613547830275
- 设备数据库
- 历史聊天记录

The "设备数据库" (Device Database) table lists the following data:

手机型号	IMEI
MI 3W	8650020232639
OPPO A33	8634680345413
F103	8609280330950
GN5001S	A100004CE812
M5 Note	8625460356175

The "历史聊天记录" (History Chat Record) section contains two sub-tables:

- 电报ID (Telegram ID)
- 电报昵称 (Telegram Nickname)

Below these are two empty panels for "普通聊天消息" (General Chat Messages) and "私密聊天" (Private Chat).

# 4. Monitoring Functions Introduction

## Front Taking Photo

Identify the target suspect by taking a photo first

## Rear Photo

Via taking rear photo, judge the location and accomplices of the target person.

## Real-time Video

Real-time recording function to better determine the actual situation of the target environment

## Real-time audio

Clear real-time voice to listen to chat content and master real-time messages

## Call Recording

Monitor target call records, master real-time messages, and develop action plans

# 1. Front Camera

Identify the target suspect by taking a front photo first

The screenshot displays a web-based interface for a '移动终端远程侦控取证系统' (Mobile Terminal Remote Control and Evidence Collection System). The interface includes a top navigation bar with the system name, a date and time display (2017/11/05 14:57:42), and a user greeting (您好: test). Below the navigation bar are several menu items: 常用软件, 系统, 社交管理, 监控 (highlighted), 历史记录, 定位, 实时消息, and 短信. The main content area features a central '前拍照' (Front Photo) window showing a live video feed of a person wearing glasses. To the left of the photo window are buttons for '前拍照' and '后拍照' (Back Photo). To the right is a '通话录音' (Call Recording) button. Below the photo window, there are two data tables. The left table lists device information:

手机型号	IMEI	IP	地址
GN5001S	A100004CE812B3	171.221.145.181	四川省成都市武侯...

The right table lists location and status information:

电子围栏	备注
5278M	

At the bottom right of the interface, there is a summary: '共计: 1/个 在线: 1/个'. The bottom of the interface shows a date and time display (2017/11/05 14:57:42) and a user greeting (您好: test).

## 2. Rear Camare

Via taking rear photo, judge the location and accomplices of the target person

## 4. Real-time voice

Clear real-time voice to listen to chat content and master real-time messages

The screenshot displays the '移动终端远程侦控取证系统' (Mobile Terminal Remote Control and Evidence Collection System) interface. At the top, it shows the date '2017/11/01', the phone number '10-53-45', and '今日登录次数: 1'. The system title is '移动终端远程侦控取证系统', and the user is identified as '您好: test'.

The main navigation bar includes: 常用软件, 系统, 社交管理, 监控 (highlighted), 历史记录, 定位, 实时消息, and 短信.

Below the navigation bar are five main function buttons: 前拍照, 后拍照, 实时录像, 实时语音 (highlighted), and 通话录音.

The '实时语音' (Real-time Voice) window is open, showing a waveform and playback controls. The playback URL is: `rtsp://119.23.38.125:1935/live/b5a6bab55662f33c.stream`. There are buttons for '开始' (Start), '结束' (End), and '打开播放器' (Open Player).

On the left side of the '实时语音' window, there is a table of mobile devices:

手机型号	IMEI	IP	地
MI 3W	865002023263973	175.100.206.66	广东省
F103	860928033095002	171.221.145.181	四川省
Coolpad B770	867265024218829	171.221.151.191	等
GN5001S	A100004CE812B3	171.221.145.181	四川省
M5 Note	862546035617504	171.221.145.181	四川省

On the right side of the '实时语音' window, there is a table of electronic fences:

电子围栏	备注
9920M	
10171M	
1312M	
5283M	
23386M	

At the bottom right of the main interface, it shows '共计: 5/个' and '在线: 4/个'. The bottom status bar repeats '今日登录次数:' and '您好:'.

## 5. Call Recording

## 5.1 History query

Re-planning through the query of historical messages, sorting out clues and ideas

The screenshot displays the '移动终端远程侦控取证系统' (Mobile Terminal Remote Control and Evidence Collection System) interface. The main window has a top navigation bar with tabs: '常用软件', '系统', '社交管理', '监控', '历史记录', '定位', '实时消息', and '短信'. The '历史记录' (History Record) tab is active, opening a '历史查看' (History View) sub-window. This sub-window is divided into two main sections: '历史设备' (History Device) and '历史记录' (History Record). The '历史设备' section lists various mobile phone models: MI 3W, GN5001S, M040, F103, M5 Note, Coolpad B770, OPPO A33, MI 5s, and OPPO A57. Below this list is a search section with a text input field for '搜索内容' and four radio button options: '搜索所有时间', '搜索当前类型', '搜索所有设备', and '搜索当前内容'. There are '搜索' (Search) and '清空' (Clear) buttons. The '历史记录' section is currently empty. To the right of the '历史记录' section is a '清空历史' (Clear History) button. Below the main content area, there are tabs for '短信', '通话', '联系人', 'QQ', '微信', '陌陌', '位置', and '电报'. The '短信' (SMS) tab is selected, showing a table with columns '号码' (Number) and '姓名' (Name). The table is currently empty. At the bottom right of the sub-window, it shows '共计: 2/个' (Total: 2/ items) and '在线: 2/个' (Online: 2/ items). The background interface shows a date of '2017/11/05', time '16:39:50', and '今日登录次数: 4'. The user is identified as '您好: test'.
